

## Notice of Availability of the Disposal of Decommissioned, Defueled Ex-Enterprise (CVN 65) and its Associated Naval Reactor Plants Final Environmental Impact Statement/Overseas Environmental Impact Statement (EIS/OEIS)

The Department of the Navy (Navy), with U.S. Department of Energy as a cooperating agency, has prepared a Final EIS/OEIS to evaluate the potential environmental impacts associated with alternatives for the disposal of the decommissioned ex-Enterprise (CVN 65) aircraft carrier, including its defueled reactor plants. The completion of the Final EIS/OEIS follows years of research, analysis, and public involvement.

### Public Involvement

The Navy is committed to keeping the public informed. The Navy obtained public input at several stages during the environmental planning process, and held in-person and virtual public meetings to provide information and answer questions.

The Final EIS/OEIS includes Navy responses to comments received during the Draft EIS/OEIS review and comment period. In compliance with the National Environmental Policy Act regulations, the Navy will wait a minimum of 30 days after publication of the Final EIS/OEIS before making a decision on the action.

The Navy invites the public to view the Final EIS/OEIS.
