

AEP Texas Inc. (AEP Texas), Electric Transmission Texas, LLC (ETT), and South Texas Electric Cooperative, Inc. (STEC) (collectively, the Applicants) give notice that they are requesting approval from the Public Utility Commission of Texas (PUC) to amend their Certificates of Convenience and Necessity (CCN) to construct the Cruce to Del Sol Double-Circuit 345-kV Transmission Line Project in Brooks, Duval, Jim Hogg, and Starr Counties. The Applicants have filed an application with the PUC for this purpose in Docket No. 55151.

The Applicants are proposing to construct the new Cruce to Del Sol 345-kilovolt (kV) Transmission Line (Project) in Brooks, Duval, Jim Hogg, and Starr Counties, Texas. The Project is planned as a double-circuit 345-kV transmission line and will begin at the future AEP Texas Cruce 345-kV Station, north of State Highway (SH) 285 approximately four miles west of the intersection of SH 285 and County Road (CR) 109 in Jim Hogg County and will extend south to terminate at the existing ETT Del Sol 345-kV Station, located approximately seven miles northeast of the City of Rio Grande City in Starr County just east of SH 755 in Starr County.

On June 30, 2023, the Applicants filed an application with the Public Utility Commission of Texas (PUC or Commission) in Docket No. 55151 - Joint Application of AEP Texas Inc., Electric Transmission Texas, LLC, and South Texas Electric Cooperative, Inc. to Amend Their Certificates of Convenience and Necessity for the Cruce-to-Del Sol Double-Circuit 345-kV Transmission Line in Brooks, Duval, Jim Hogg, and Starr Counties (Application).

The Applicants have proposed 21 alternative transmission line routes in their Application for the PUC's consideration. The routing options for this Project range from approximately 70

miles to 92 miles in length. The estimated cost of the routing options ranges from approximately \$247.03 million to \$328.64 million. AEP Texas and ETT plan to construct their transmission line on BOLD™ steel lattice structures and STEC plans to construct its transmission line on lattice angle iron structures, both within a typical right-of-way width of approximately 150 feet (75 feet on either side of the centerline).

The PUC has a brochure entitled "Landowners and Transmission Line Cases at the PUC" which provides basic information about how you may participate in this docket, and how you may contact the PUC. Copies of the brochure are available from Roy R. Bermea at (512) 481-4575 or may be downloaded from the PUC's website at www.puc.state.tx.us. The brochure includes sample forms for making comments and for making a request to intervene as a party in this docket. In addition to the contacts listed in the brochure, you may call the PUC's Customer Assistance Hotline at (512) 936-7120 or toll free at (888) 782-8477. Hearing- and speech-impaired individuals with text telephones (TTY) may contact the PUC's Customer Assistance Hotline at (512) 936-7136 or toll free at (800) 735-2989.

Persons who are affected by the proposed transmission line and wish to intervene in the docket or comment on the applicant's application should mail the original and 10 copies of their requests to intervene or their comments to:

Public Utility Commission of Texas
Central Records
Attn: Filing Clerk
1701 N. Congress Ave.
P.O. Box 13326
Austin, Texas 78711-3326

The deadline for intervention in the docket is July 31, 2023; and the PUC should receive a

letter from anyone requesting intervention by that date.

Persons who wish to intervene in the docket must also mail a copy of their request for intervention to all parties in the docket and all persons that have pending motions to intervene, at or before the time the request for intervention is mailed to the PUC. In addition to the intervention deadline, other important deadlines may already exist that affect your participation in this docket. You should review the orders and other filings already made in the docket.

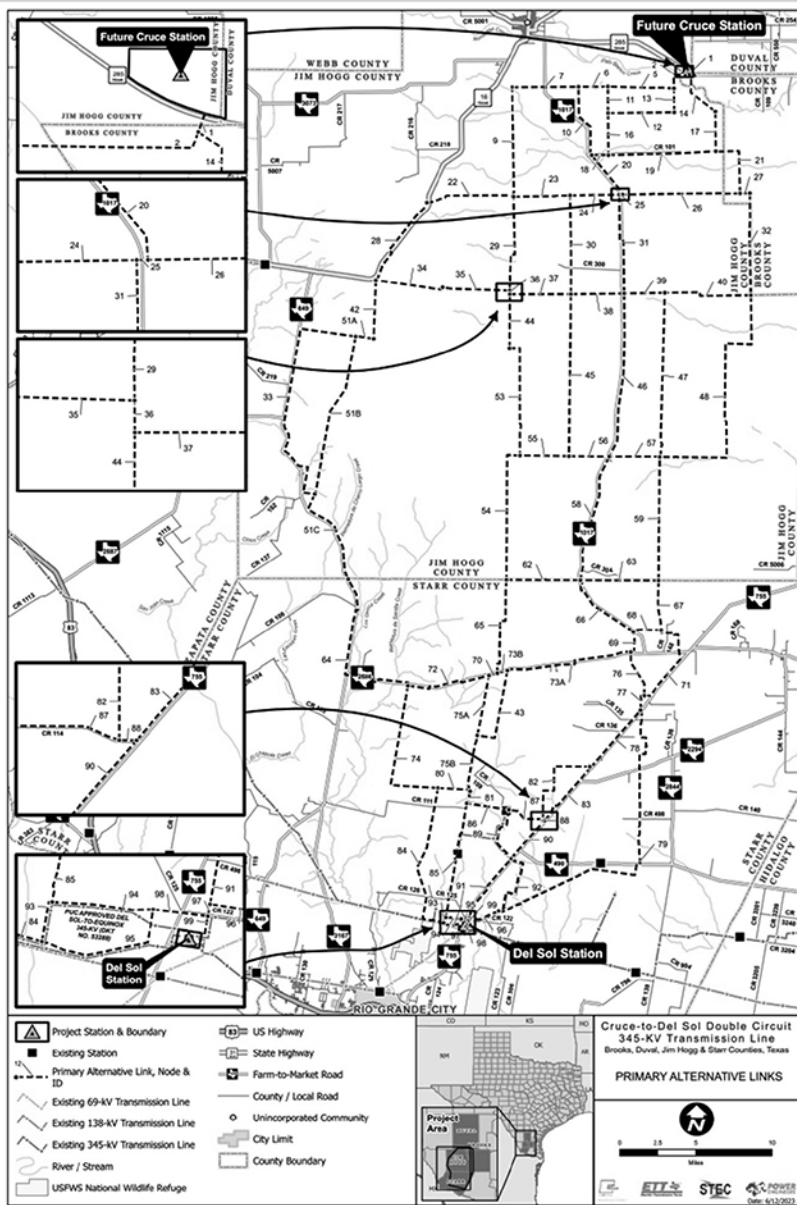

The only way to fully participate in the PUC's decision on where to locate the transmission line is to intervene in the docket. It is important for an affected person to intervene because the utility is not obligated to keep affected persons informed of the PUC's proceedings and cannot predict which route may or may not be approved by the PUC.

All routes and route segments included in this notice are available for selection and approval by the Public Utility Commission of Texas.

A detailed routing map may be reviewed during normal business hours at the Jim Hogg County Library located at 210 N. Smith Ave. in Hebronville, Texas, and at the Rio Grande City Public Library located at 591 E. 3rd St. in Rio Grande City, Texas.

If you have questions about the transmission line project, you may contact the Applicants' Regulatory Project Team: Kensley Greuter at (512) 391-6314 or Roy Bermea at (512) 481-4575.

In the CCN application for this project, the Applicants have presented 93 links to develop possible routes for the Project. For consideration by the PUC, the Applicants have presented 21 different routes with different link combinations of the presented 93 links from the future AEP Texas Cruce 345-kV Station to the existing ETT Del Sol 345-kV Station. *Any one of the routes or combination of the proposed route segments (links) included in this notice are available for selection and approval by the Public Utility Commission of Texas.*

The following table lists the link combinations that make up the Applicants' 21 routes.

Route	Link Combinations	Length
A	1-14-17-19-18-20-25-31-46-58-62-65-73B-43-75B-81-85-94-98-99	73.21

The following narrative, along with the enclosed maps that show the locations of these links, provides a detailed description of the links that form the 21 routes that the Applicants presented to the PUC for consideration.

LINK 1

Link 1 begins at the future AEP Texas Cruce 345-kV Station approximately 90.88 feet north of State Highway (SH) 285 and approximately 9.85 miles southeast of Hebronville. The link heads southwest for approximately 0.10 mile crossing SH 285 and into Brooks County, before it terminates at its intersection with Links 2 and 14. Total length is 0.10 mile.

LINK 2

Link 2 begins at its intersection with Links 1 and 14. The link proceeds southwest for approximately 0.08 mile. The link then angles west for approximately 0.88 mile crossing Palo Blanco Creek and into Jim Hogg County. The link then angles south for approximately 0.88 mile, before it terminates at its intersection with Links 5 and 13. Total length is 1.84 miles.

LINK 5

Link 5 begins at its intersection with Links 2 and 13. The link proceeds west for approximately 3.87 miles, before it terminates at its intersection with Links 6 and 11. Total length is 3.87 miles.

LINK 6

Link 6 begins at its intersection with Links 5 and 11. The link proceeds west for approximately 1.73 miles crossing one unnamed stream, before it terminates at its intersection with Links 7 and 10. Total length is 1.73 miles.

LINK 7

Link 7 begins at its intersection with Links 6 and 11. The link proceeds west for approximately 3.86 miles crossing Farm to Market (FM) Road 1017, before it terminates at its intersection with Link 9. Total length is 3.86 miles.

LINK 9

Link 9 begins at its intersection with Link 7. The link proceeds south for approximately 7.15 miles crossing three unnamed streams, before it terminates at its intersection with Links 22, 23 and 29. Total length is 7.15 miles.

LINK 10

Link 10 begins at its intersection with Links 6 and 7. The link proceeds south for approximately 2.17 miles. The link then angles southeast for approximately 0.80 mile paralleling the north side of FM 1017. The link then angles south for approximately 1.68 miles paralleling the north side of FM 1017 and crossing CR 101, before it terminates at its intersection with Links 18 and 20. Total length is 4.65 miles.

LINK 11

Link 11 begins at its intersection with Links 5 and 6. The link proceeds south for approximately 1.72 miles, before it terminates at its intersection with Links 12 and 16. Total length is 1.72 miles.

LINK 12

Link 12 begins at its intersection with Link 13. The link proceeds west for approximately 3.87 miles, before it terminates at its intersection with Links 11 and 16. Total length is 3.87 miles.

LINK 13

Link 13 begins at its intersection with Links 2 and 5. The link proceeds south for approximately 1.55 miles, before it terminates at its intersection with Link 12. Total length is 1.55 miles.

LINK 14

Link 14 begins at its intersection with Links 1 and 2. The link proceeds southeast for approximately 0.14 mile. The link then angles south for approximately 1.13 miles crossing Palo Blanco Creek and into Jim Hogg County. The link then angles southeast for approximately 1.87 miles, before it terminates at its intersection with Link 17. Total length is 3.14 miles.

LINK 16

Link 16 begins at its intersection with Links 11 and 12. The link proceeds south for approximately 2.69 miles crossing one unnamed stream and County Road (CR) 101, before it terminates at its intersection with Links 18 and 19. Total length is 2.69 miles.

LINK 17

Link 17 begins at its intersection with Link 14. The link proceeds south for approximately 2.61 miles, before it terminates at its intersection with Links 19 and 21. Total length is 2.61 miles.

LINK 18

Link 18 begins at its intersection with Links 16 and 19. The link proceeds west for approximately 1.14 miles crossing two unnamed streams and paralleling the south side of CR 101, before it terminates at its intersection with Links 10 and 20. Total length is 1.14 miles.

LINK 19

Link 19 begins at its intersection with Links 17 and 21. The link proceeds west for approximately 6.28 miles crossing one unnamed stream and paralleling the south side of CR 101, before it terminates at its intersection with Links 16 and 18. Total length is 6.28 miles.

LINK 20

Link 20 begins at its intersection with Links 10 and 18. The link proceeds southeast for approximately 3.16 miles crossing two unnamed streams and paralleling the north side of FM 1017. The link then angles south for approximately 0.10 mile, before it terminates at its intersection with Links 25 and 26. Total length is 3.26 miles.

LINK 21

Link 21 begins at its intersection with Link 17 and 19. The link proceeds east for approximately 1.40 miles crossing into Brooks County. The link then angles south for approximately 2.75 miles crossing one unnamed stream, before it terminates at its intersection with Links 26 and 27. Total length is 4.15 miles.

LINK 22

Link 22 begins at its intersection with Links 9, 23 and 29. The link proceeds west for approximately 3.95 miles. The link then angles southwest for approximately 0.15 mile. The link then angles west-southwest for approximately 1.31 miles crossing SH 16, before it terminates at its intersection with Link 28. Total length is 5.14 miles.

LINK 23

Link 23 begins at its intersection with Links 24 and 30. The link proceeds west for approximately 3.28 miles, before it terminates at its intersection with Links 9, 22 and 29. Total length is 3.28 miles.

LINK 24

Link 24 begins at its intersection with Links 25 and 31. The link proceeds west for approximately 2.97 miles, before it terminates at its intersection with Links 23 and 30. Total length is 2.97 miles.

LINK 25

Link 25 begins at its intersection with Links 20 and 26. The link proceeds west for approximately 0.05 mile crossing FM 1017, before it terminates at its intersection with Links 24 and 31. Total length is 0.05 mile.

LINK 26

Link 26 begins at its intersection with Links 21 and 27. The link proceeds west for approximately 6.99 miles crossing into Jim Hogg County, before it terminates at its intersection with Links 20 and 25. Total length is 6.99 miles.

LINK 27

Link 27 begins at its intersection with Links 21 and 26. The link proceeds east for approximately 0.57 mile, before it terminates at its intersection with Link 32. Total length is 0.57 mile.

LINK 28

Link 28 begins at its intersection with Link 22. The link proceeds southwest for approximately 3.93 miles paralleling the northwest side of SH 16, then angles southeast for approximately 0.06 mile crossing SH 16. The link then angles southwest for approximately 1.00 mile paralleling the southeast side of SH 16. The link then angles south-southwest for approximately 1.08 miles paralleling the southeast side of SH 16, before it terminates at its intersection with Links 34 and 42. Total length is 6.07 miles.

LINK 29

Link 29 begins at its intersection with Links 9, 22 and 23. The link proceeds south for approximately 3.81 miles. The link then angles west for approximately 0.26 mile. The link then angles south for approximately 2.35 miles crossing one unnamed stream, before it terminates at its intersection with Links 35 and 36. Total length is 6.42 miles.

LINK 30

Link 30 begins at its intersection with Links 23 and 24. The link proceeds south for approximately 6.48 miles crossing CR 300, before it terminates at its intersection with Links 37, 38 and 45. Total length is 6.48 mile.

LINK 31

Link 31 begins at its intersection with Links 24 and 25. The link proceeds south for approximately 3.06 miles paralleling the west side of FM 1017. The link then angles east for approximately 0.06 mile crossing FM 1017. The link then angles south for approximately 3.42 miles paralleling the east side of FM 1017, before it terminates at its intersection with Links 38, 39 and 46. Total length is 6.54 miles.

LINK 32

Link 32 begins at its intersection with Link 27. The link proceeds south for approximately 6.69 miles crossing into Jim Hogg County, before it terminates at its intersection with Links 40 and 48. Total length is 6.69 miles.

LINK 33

Link 33 begins at its intersection with Links 51A and 51B. The link proceeds west for approximately 3.30 miles. The link then angles south for approximately 6.35 miles paralleling the east side of FM 649 and crossing two unnamed streams. The link then angles southeast for approximately 1.01 mile paralleling the east side of FM 649. The link then angles southwest for approximately 0.87 mile paralleling the east side of FM 649. The link then angles southeast for approximately 1.29 mile. The link then angles east for approximately 0.62 mile. The link then angles south for approximately 1.70 miles crossing one unnamed stream. The link then angles east for approximately 0.67 mile, before it terminates at its intersection with Links 51B and 51C. Total length is 15.81 miles.

LINK 34

Link 34 begins at its intersection with Link 35. The link proceeds southwest for approximately 0.17 mile. The link then angles west for approximately 3.90 miles, before it terminates at its intersection with Links 28 and 42. Total length is 4.07 miles.

LINK 35

Link 35 begins at its intersection with Links 29 and 36. The link proceeds west for approximately 3.91 miles, before it terminates at its intersection with Link 34. Total length is 3.91 miles.

LINK 36

Link 36 begins at its intersection with Links 29 and 35. The link proceeds south for approximately 0.24 mile, before it terminates at its intersection with Links 37 and 44. Total length is 0.24 mile.

LINK 37

Link 37 begins at its intersection with Links 30, 38 and 45. The link proceeds west for approximately 3.58 miles, before it terminates at its intersection with Links 36 and 44. Total length is 3.58 miles.

LINK 38

Link 38 begins at its intersection with Links 31, 39 and 46. The link proceeds west for approximately 3.04 miles crossing FM 1017, before it terminates at its intersection with Links 30, 37 and 45. Total length is 3.04 miles.

LINK 39

Link 39 begins at its intersection with Links 31, 38 and 46. The link proceeds east for approximately 2.48 miles, before it terminates at its intersection with Links 40 and 47. Total length is 2.48 miles.

LINK 40

Link 40 begins at its intersection with Links 32 and 48. The link proceeds west for approximately 2.99 miles. The link then angles north for approximately 0.24 mile. The link then angles west for approximately 2.04 miles, before it terminates at its intersection with Links 39 and 47. Total length is 5.27 miles.

LINK 42

Link 42 begins at its intersection with Links 28 and 34. The link proceeds south for approximately 3.82 miles, before it terminates at its intersection with Link 51A. Total length is 3.82 miles.

LINK 43

Link 43 begins at its intersection with Links 73A and 73B. The link proceeds south-southwest for approximately 4.55 miles crossing one unnamed stream. The link then angles west for approximately 1.00 mile, before it terminates at its intersection with Links 75A and 75B. Total length is 5.55 miles.

LINK 44

Link 44 begins at its intersection with Links 36 and 37. The link proceeds south for approximately 3.52 miles, before it terminates at its intersection with Link 53. Total length is 3.52 miles.

LINK 45

Link 45 begins at its intersection with Links 30, 37 and 38. The link proceeds south for approximately 10.60 miles, before it terminates at its intersection with Links 55 and 56. Total length is 10.60 miles.

LINK 46

Link 46 begins at its intersection with Links 31, 38 and 39. The link proceeds south for approximately 5.24 miles paralleling the east side of FM 1017. The link then angles southwest for approximately 2.51 miles paralleling the east side of FM 1017. The link then angles south for approximately 1.99 miles paralleling the east side of FM 1017. The link then angles southwest for approximately 1.10 miles paralleling the east side of FM 1017, before it terminates at its intersection with Links 56, 57 and 58. Total length is 10.84 miles.

LINK 47

Link 47 begins at its intersection with Links 39 and 40. The link proceeds south for approximately 9.71 miles crossing one unnamed stream. The link then angles southeast for approximately 0.31 mile. The link then angles southwest for approximately 0.05 mile. The link then angles south for approximately 0.70 mile, before it terminates at its intersection with Links 48, 57 and 59. Total length is 10.77 miles.

LINK 48

Link 48 begins at its intersection with Links 32 and 40. The link proceeds south for approximately 3.20 miles crossing one unnamed stream. The link angles west for approximately 1.54 miles. The link then angles south for approximately 4.98 miles. The link then angles southeast for approximately 0.17 mile. The link then angles south for approximately 2.35 miles crossing one unnamed stream. The link then angles west for approximately 3.94 miles crossing one unnamed stream, before it terminates at its intersection Links 47, 57 and 59. Total length is 16.18 miles.

LINK 51A

Link 51A begins at its intersection with Link 42. The link proceeds west for approximately 1.10 miles, before it terminates at its intersection with Links 33 and 51B. Total length is 1.10 miles.

LINK 51B

Link 51B begins at its intersection with Links 33 and 51A. The link proceeds south-southwest for approximately 3.51 miles. The link then angles west-southwest for approximately 1.72 miles. The link then angles south-southwest for approximately 2.79 miles crossing two unnamed streams. The link then angles west-southwest for approximately 0.15 mile. The link then angles southeast for approximately 0.15 mile. The link then angles south-southwest for approximately 2.42 miles crossing two unnamed streams, before it terminates at its intersection with Links 33 and 51C. Total length is 10.74 miles.

LINK 51C

Link 51C begins at its intersection with Links 33 and 51B. The link proceeds southwest for approximately 1.15 miles. The link then angles southeast for approximately 1.44 miles, paralleling the north side of FM 649. The link then angles south-southeast for approximately 1.82 miles, crossing Remadura de Charco Largo Creek, and paralleling the north side of FM 649. The link then angles southeast for approximately 1.62 miles, paralleling the north side of FM 649. The link then angles south for approximately 0.53 mile, crossing into Starr County and paralleling the north side of FM 649, before it terminates at its intersection with Link 64. Total length is 6.56 miles.

LINK 53

Link 53 begins at its intersection with Links 44. The link proceeds east for approximately 0.63 mile, then angles south for approximately 7.05 miles, before it terminates at its intersection with Links 54 and 55. Total length is 7.68 mile.

LINK 54

Link 54 begins at its intersection with Links 53 and 55. The link proceeds west for approximately 0.79 mile, then angles south for approximately 8.16 miles, crossing into Starr County, before it terminates at its intersection with Links 62 and 65. Total length is 8.95 miles.

LINK 55

Link 55 begins at its intersection with Links 45 and 56. The link proceeds west for approximately 2.85 miles, before it terminates at its intersection with Links 53 and 54. Total length is 2.85 miles.

LINK 56

Link 56 begins at its intersection with Links 45 and 55. The link proceeds east for approximately 2.31 miles, crossing FM 1017, before it terminates at its intersection with Links 46, 57 and 58. Total length is 2.31 miles.

LINK 57

Link 57 begins at its intersection with Links 46, 56 and 58. The link proceeds east for approximately 3.05 miles, before it terminates at its intersection with Links 47, 48 and 59. Total length is 3.05 miles.

LINK 58

Link 58 begins at its intersection with Links 46, 56 and 57. The link proceeds southwest for approximately 1.36 miles, paralleling the east side of FM 1017. The link then angles south for approximately 1.08 miles, paralleling the east side of FM 1017. The link then angles southwest for approximately 3.98 miles paralleling the east side of FM 1017. The link then angles south-southwest for approximately 2.00 miles, paralleling the east side of FM 1017 and crossing CR 304, before it terminates at its intersection with Links 62, 63 and 66. Total length is 8.42 miles.

LINK 59

Link 59 begins at its intersection with Links 47, 48 and 57. The link proceeds south for approximately 8.08 miles, crossing one unnamed stream, before it terminates at its intersection with Links 63 and 67. Total length is 8.08 miles.

LINK 62

Link 62 begins at its intersection with Links 58, 63 and 66. The link proceeds west for approximately 4.30 miles, crossing FM 1017 and paralleling Jim Hogg County border, before it terminates at its intersection with Links 54 and 65. Total length is 4.30 miles.

LINK 63

Link 63 begins at its intersection with Links 59 and 67. The link proceeds west for approximately 4.69 miles, paralleling Jim Hogg County border, before it terminates at its intersection with Links 58, 62 and 66. Total length is 4.69 miles.

LINK 64

Link 64 begins at its intersection with Link 51C. The link proceeds southeast for approximately 1.14 miles paralleling the east side of FM 649, crossing into Starr County. The link then angles south-southeast for approximately 1.01 miles paralleling the east side of FM 649, then turns west for approximately 0.04 mile crossing FM 649. The link then angles southwest for approximately 4.21 miles, paralleling the west side of FM 649. The link then turns east for approximately 1.96 miles paralleling the south side of FM 2686, then turns north for approximately 0.05 mile crossing FM 2686. The link then angles east for approximately 1.74 miles, paralleling the north side of FM 2686, then angles south for approximately 0.04 mile, before it terminates at its intersection with Links 72 and 74. Total length is 10.19 miles.

LINK 65

Link 65 begins at its intersection with Links 54 and 62. The link proceeds south for approximately 2.70 miles, then turns west for approximately 0.31 mile. The link then angles south for approximately 2.79 miles, then turns west for approximately 0.13 mile. The link then angles south for approximately 0.58 mile, crossing FM 2686, before it terminates at its intersection with Links 70 and 73B. Total length is 6.51 miles.

LINK 66

Link 66 begins at its intersection with Links 58, 62 and 63. The link proceeds southeast for approximately 0.40 mile paralleling the east side of FM 1017, then turns west for approximately 0.11 mile crossing FM 1017. The link then angles south for approximately 0.27 mile, then angles east for approximately 0.21 mile. The link then angles southeast for approximately 1.11 miles paralleling the west side of FM 1017. The link then turns east-southeast for approximately 2.88 miles, paralleling the west side of FM 1017, before it terminates at its intersection with Links 68 and 69. Total length is 4.98 miles.

LINK 67

Link 67 begins at its intersection with Links 59 and 63. The link proceeds south for approximately 1.53 miles, then angles southeast for approximately 1.72 miles, before it terminates at its intersection with Links 68 and 71. Total length is 3.25 miles.

LINK 68

Link 68 begins at its intersection with Links 67 and 71. The link proceeds west for approximately 1.69 miles, crossing FM 1017, before it terminates at its intersection with Links 66 and 69. Total length is 1.69 miles.

LINK 69

Link 69 begins at its intersection with Links 66 and 68. The link proceeds south for approximately 1.24 miles, then turns southwest for approximately 0.26 mile, before it terminates at its intersection with Links 73A and 76. Total length is 1.50 miles.

LINK 70

Link 70 begins at its intersection with Links 65 and 73B. The link proceeds southwest for approximately 0.50 mile, before it terminates at its intersection with Link 72 and 75A. Total length is 0.50 mile.

LINK 71

Link 71 begins at its intersection with Links 67 and 68. The link proceeds south for approximately 0.18 mile, then turns east for approximately 0.73 mile, crossing CR 148. The link then angles south for approximately 0.11 mile, then turns east for approximately 0.26 mile. The link then angles south for approximately 1.72 miles, crossing FM 2686, then turns southwest for approximately 2.84 miles, paralleling the northwest side of FM 755. The link then angles west for approximately 0.44 mile, before it terminates at its intersection with Links 76 and 77. Total length is 6.28 miles.

LINK 72

Link 72 begins at its intersection with Links 70 and 75A. The link proceeds southwest for approximately 1.70 miles, paralleling the south side of FM 2686 and crossing two unnamed streams. The link then turns north for approximately 0.05 mile, crossing FM 2686. The link then angles southwest for approximately 1.91 miles, paralleling the north side of FM 2686 and crossing one unnamed stream. The link then turns south for approximately 0.05 mile, crossing FM 2686. The link then angles west for approximately 1.27 miles, paralleling the south side of FM 2686, before it terminates at its intersection with Links 64 and 74. Total length is 4.98 miles.

LINK 73A

Link 73A begins at its intersection with Links 69 and 76. The link proceeds southwest for approximately 3.36 miles, paralleling the north side of FM 2686, then turns south for approximately 0.17 mile, crossing FM 2686. The link then angles southwest for approximately 4.00 miles, paralleling the south side of FM 2686, before it terminates at its intersection with Links 43 and 73B. Total length is 7.53 miles.

LINK 73B

Link 73B begins at its intersection with Links 65 and 70. The link proceeds northeast for approximately 0.62 mile, paralleling the south side of FM 2686 before it terminates at its intersection with Links 43 and 73A. Total length is 0.62 mile.

LINK 74

Link 74 begins at its intersection with Links 64 and 72. The link proceeds south for approximately 6.67 miles, crossing two unnamed streams, then turns east for approximately 2.76 miles, before it terminates at its intersection with Links 80 and 84. Total length is 9.43 miles.

LINK 75A

Link 75A begins at its intersection with Links 70 and 72. The link proceeds south for approximately 4.04 miles, crossing one unnamed stream, before it terminates at its intersection with Links 43 and 75B. Total length is 4.04 miles.

LINK 75B

Link 75B begins at its intersection with Links 43 and 75A. The link proceeds south for approximately 3.24 miles, crossing one unnamed stream, then turns southeast for approximately 0.49 mile, before it terminates at its intersection with Links 80 and 81. Total length is 3.73 miles.

LINK 76

Link 76 begins at its intersection with Links 69 and 73A. The link proceeds south for approximately 0.63 mile, crossing FM 2686, then turns southeast for approximately 1.57 miles, then turns south for approximately 0.77 mile, before it terminates at its intersection with Links 71 and 77. Total length is 2.97 miles.

LINK 77

Link 77 begins at its intersection with Links 71 and 76. The link proceeds west for approximately 0.22 miles, then turns south for approximately 1.01 mile, before it terminates at its intersection with Links 78 and 79. Total length is 1.23 miles.

LINK 78

Link 78 begins at its intersection with Links 77 and 79. The link proceeds southwest for approximately 4.71 miles, paralleling the northwest side of FM 755 and crossing CR 135 and CR 136, before it terminates at its intersection with Links 82 and 83. Total length is 4.71 miles.

LINK 79

Link 79 begins at its intersection with Links 77 and 78. The link proceeds south for approximately 1.76 miles, crossing FM 755 and CR 135. The link then angles east for approximately 0.32 mile, then turns south for approximately 1.10 miles, then turns west for approximately 0.36 mile. The link then angles south for approximately 7.32 miles, crossing FM 2294, CR 498, one unnamed stream, and FM 490. The link then angles west for approximately 0.20 mile, paralleling the south side of FM 490. The link then angles southwest for approximately 0.69 mile, then turns northwest for approximately 2.62 miles. The link then angles southwest for approximately 6.12 miles, paralleling the southeast side of an existing transmission line, before it terminates at its intersection with Links 92 and 96. Total length is 20.49 miles.

LINK 80

Link 80 begins at its intersection with Links 74 and 84. The link proceeds east for approximately 1.94 miles, crossing one unnamed stream, before it terminates at its intersection with Links 75B and 81. Total length is 1.94 miles.

LINK 81

Link 81 begins at its intersection with Links 75B and 80. The link proceeds south for approximately 0.84 mile, crossing two unnamed streams, before it terminates at its intersection with Links 85 and 86. Total length is 0.84 mile.

LINK 82

Link 82 begins at its intersection with Links 78 and 83. The link proceeds west for approximately 2.15 miles, then turns south for approximately 1.61 miles, crossing one unnamed stream. The link then angles west for approximately 0.62 mile, crossing one unnamed stream. The link then turns south for approximately 1.97 miles, crossing one unnamed stream before it terminates at its intersection with Links 87 and 88. Total length is 6.35 miles.

LINK 83

Link 83 begins at its intersection with Links 78 and 82. The link proceeds southwest for approximately 4.68 miles, paralleling the northwest side of FM 755, crossing an unnamed stream before it terminates at its intersection with Links 88 and 90. Total length is 4.68 miles.

LINK 84

Link 84 begins at its intersection with Links 74 and 80. The link proceeds south for approximately 3.97 miles crossing CR 111, then turns southwest for approximately 1.43 miles. The link then angles southeast for approximately 2.00 miles, then turns south for approximately 1.50 miles, crossing CR 126. The link then angles east for approximately 1.30 miles, crossing and paralleling the north side of an existing transmission line, before it terminates at its intersection with Links 93 and 95. Total length is 10.20 miles.

LINK 85

Link 85 begins at its intersection with Links 81 and 86. The link proceeds south for approximately 3.27 miles, crossing CR 111, then turns southwest for approximately 0.23 mile, then turns south for approximately 0.19 mile, paralleling the west side of an existing transmission line then passing through an existing station, then turns southeast for approximately 0.28 mile. The link then angles south for approximately 3.73 miles, crossing one unnamed stream and CR 125, before it terminates at its intersection with Links 93 and 94. Total length is 7.70 miles.

LINK 86

Link 86 begins at its intersection with Links 81 and 85. The link proceeds east for approximately 2.46 miles, crossing one unnamed stream, before it terminates at its intersection with Links 87 and 89. Total length is 2.46 miles.

LINK 87

Link 87 begins at its intersection with Links 82 and 88. The link proceeds west for approximately 1.16 mile, then turns northwest for approximately 0.63 mile. The link then angles west for approximately 0.53 miles, before it terminates at its intersection with Links 86 and 89. Total length is 2.32 miles.

LINK 88

Link 88 begins at its intersection with Links 82 and 87. The link proceeds east for approximately 0.11 mile, before it terminates at its intersection with Links 83 and 90. Total length is 0.11 mile.

LINK 89

Link 89 begins at its intersection with Links 86 and 87. The link proceeds south for approximately 0.94 mile, then turns southwest for approximately 0.45 mile, paralleling the east side of an existing transmission line and crossing one unnamed stream. The link then angles south for approximately 1.07 miles, paralleling the east side of an existing transmission line, then turns southeast for approximately 1.43 miles, paralleling the east side of an existing transmission line and crossing one unnamed stream, before it terminates at its intersection with Links 90, 91 and 92. Total length is 3.89 miles.

LINK 90

Link 90 begins at its intersection with Links 83 and 88. The link proceeds southwest for approximately 3.25 miles, paralleling the northwest side of FM 755 and crossing one unnamed stream, before it terminates at its intersection with Links 89, 91 and 92. Total length is 3.25 miles.

LINK 91

Link 91 begins at its intersection with Links 89, 91 and 92. The link proceeds southwest for approximately 2.25 miles, paralleling the northwest side of FM 755 crossing an existing transmission line and one unnamed stream. The link turns southeast for approximately 0.05 mile crossing FM 755. The link angles southwest for approximately 1.56 miles paralleling the southeast side of FM 755 crossing one unnamed stream. The link then angles south for approximately 0.79 mile, crossing CR 496, before it terminates at its intersection with Links 96 and 97. Total length is 4.65 miles.

LINK 92

Link 92 begins at its intersection with Links 89, 90 and 91. The link proceeds southeast for approximately 0.72 mile, crossing FM 755 and paralleling the east side of an existing transmission line. The link then angles south for approximately 0.79 mile, paralleling the east side of an existing transmission line, then turns southwest for approximately 0.11 mile, crossing an existing transmission line. The link then angles south for approximately 1.17 miles, paralleling the west side of an existing transmission line and crossing one unnamed stream. The link then angles west for approximately 0.57 mile, paralleling the west side of an existing transmission line. The link then angles south for approximately 1.11 paralleling the west side of an existing transmission line, then turns southwest for approximately 0.26 mile, paralleling the west side of an existing transmission line, before it terminates at its intersection with Links 79 and 96. Total length is 4.73 miles.

LINK 93

Link 93 begins at its intersection with Links 84 and 95. The link proceeds north for approximately 0.40 mile, paralleling the west side of an existing transmission line. The link then angles northeast for approximately 0.03 mile, paralleling the north side of an existing transmission line, before it terminates at its intersection with Links 85 and 94. Total length is 0.43 mile.

LINK 94

Link 94 begins at its intersection with Links 85 and 93. The link proceeds east for approximately 0.73 mile, paralleling the north side of an existing transmission line. The link then angles east-northeast for approximately 0.18 mile, before it terminates at its intersection with Links 95 and 98. Total length is 0.91 mile.

LINK 95

Link 95 begins at its intersection with Links 84 and 93. The link proceeds east-southeast for approximately 0.42 mile, crossing then paralleling the north side of an existing transmission line, then turns northeast for approximately 0.55 mile, paralleling the north side of an existing transmission line. The link then angles north for approximately 0.34 mile, crossing an existing transmission line, before it terminates at its intersection with Links 94 and 98. Total length is 1.31 miles.

LINK 96

Link 96 begins at its intersection with Links 79 and 92. The link proceeds southwest for approximately 1.24 miles, paralleling the north side of an existing transmission line and crossing two unnamed streams. The link then angles west for approximately 0.65 mile, before it terminates at its intersection with Links 91 and 97. Total length is 1.89 miles.

LINK 97

Link 97 begins at its intersection with Links 91 and 96. The link proceeds south for approximately 0.12 mile crossing CR 122, before it terminates at its intersection with Links 98 and 99. Total length is 0.12 mile.

LINK 98

Link 98 begins at its intersection with Links 94 and 95. The link proceeds east for approximately 0.49 mile, crossing FM 755, before it terminates at its intersection with Links 97 and 99. Total length is 0.49 mile.

LINK 99

Link 99 begins at its intersection with Links 97 and 98. The link proceeds south for approximately 0.18 mile, paralleling the west side of an existing transmission line, before it terminates at the ETT Del Sol 345-kV Station located approximately 7.23 miles northeast of Rio Grande City and just east of FM 755 in Starr County. Total length is 0.18 mile.
