

“Commie” Harris’ Policies

“Commie” Harris’ actions speak louder than her words. In the counterintelligence world, associations mean a great deal. So, let’s see what experience shows us that she might propose as president. We need to dismiss what she says now to get elected and look at her past remarks and actions.

1) Harris will continue disagreeing with our withdrawal from the Paris Climate Accord, which was very stacked against us. She was against the reversal of Obama’s fuel efficiency standards. She was against repealing the methane regulations. She has a 100% lifetime score from the League of Conservation Voters.

2) Harris believes in the College For All Act proposed by socialist Bernie Sanders for students with incomes under \$125,000 yearly and funded by a fee or tax of 0.5% on stock trades. She would expand Head Start and Early Head Start, which have failed, and create a National Universal Kinder program with no specifics.

3) Harris would early on seek to ban so-called assault weapons and magazines with more than 10 cartridges. These rifles are not, no-way assault weapons as anyone in the military will attest. She would also curtail some advertising.

4) Harris would support some kind of national health care, while outlawing private health care. If that doesn’t fly, she would put heavy rules on private health care to force everyone into the national, budget-breaking plan.

5) Harris wants to “re-examine ICE”, whatever that means. She will support and apply DACA to bring more illegals into the country. And, of course, she will not extend the border wall or repair or enhance it.

6) Harris supports abortions available to all, same-sex marriage made legal, transgender use of the bathroom of choice, but she does not fully support payment for reassignment surgery.

7) Harris would reverse some of the measures in the Tax Cuts and Jobs Act, but create new tax breaks for lower and middle class payers, while adding fees for some banks and financial institutions (passed off onto the client).

8) Harris will oppose Trump’s tariff and trade policies to the detriment of the U.S.

9) Harris will seek a political solution everywhere that our troops are stationed in order to bring them home. Not a totally bad idea, but quite unworkable in many instances.

10) Harris and Waltz will do all in their power to make their new vision of America be one filled with their socialist ideas as they seek to move our nation ever closer to socialism and then communism.

What readers need to remember is that the actions of Harris and Waltz will tell more about their positions than all their words in campaigning.
