appreciation

1 in 54 Children in
the US are
diagnosed with
autism.

There is no blood
test used for
diagnosis.

Observation is used
for detection.

Boys are four times
more likely to be
diagnosed with
autism than girls.

With early intervention,
inclusion and acceptance,
children and adults with
autism can learn, socialize,
work and have happy lives
living independently or
with support.

Types of Autism

- Autism Spectrum Disorder
- Pervasive Development Disorder (PDD)
- Asperger's Syndrome
- Rett Syndrome
 - Only known to be diagnosed in girls
- Childhood Disintegrative Disorder

The Autism Awareness Ribbon

The puzzle pattern of this ribbon reflects the mystery and complexity of autism. The different colors and shapes represents the diversity of people and families living with this disorder. The brightness of the ribbon signals hope - hope through research and increasing awareness in people like you.
