POSITION AVAILABLE

JOB TITLE: Pre-Sales and Services Delivery Engineer

JOB LOCATION: McAllen, TX

JOB DUTIES: The Sales and Service Delivery engineer is the head of the Pre-Sales and Service Delivery Department. The main duty of the position is to assist the sales department as to all technical aspects of all proposed sales projects, from the pre-sale stage to final infrastructure delivery. In specific, every sales project and delivery plan must efficiently and properly fill all technical and telecommunications requirements as to space, power and connectivity outside and inside the customer's data site. Once all infrastructure resources are ready, the Pre-Sales and Service Delivery Engineer must ensure the successful enabling of the service, according to customer requirements and standards. Please note that the three supervised employees hold the same position of Infrastructure Manager, which we consider to fall under the occupational SOC/O*NET (OES) code 15-1142, Network and Computer Systems Administrators. The main duty of the supervised position of Infrastructure is to ensure the day to day efficient operations of all aspects of their assigned Data Center including Critical Infrastructure, and drive both internal and external customer requirements. Travel once a month for approximately two days to different client site locations in the states of California, Arizona, Florida, Texas and Mexico.

MINIMUM REQUIREMENTS: Bachelor's Degree in Electronic Systems Engineering and 24 months in Technical Sales and Delivery of Telecom Services position(s) with similar job duties. Travel once a month for approximately two days to different client site locations in the states of California, Arizona, Florida, Texas and Mexico.
